Bengaluru (Open to Relocation anywhere in India)

PROFESSIONAL SUMMARY

Android Developer with 3+ years of experience building high-performance mobile applications in Fintech and Healthcare domains. Proficient in Kotlin, Jetpack Compose, and MVVM architecture. Proven ability to deliver secure, scalable, and user-centric Android solutions.

TECHNICAL SKILLS

Kotlin, Java, Jetpack Compose, XML, MVVM, MVP, Clean Architecture, Android SDK, Android Studio, Android framework, REST APIs, Retrofit, OkHttp, Room, SQLite, Firebase, Kotlin Coroutines, Hilt, Dagger, Junit, debugging, logcat, ADB, Git, JIRA

PROFESSIONAL EXPERIENCE

Android Developer | **Tarang Software Technologies** | Nov 2023 – April 2026 -2.6yr, Bengaluru

- Developed Android applications for Fintech/Banking clients using modern Android architectures like MVVM, Compose for declarative UI, Navigation, and LiveData for reactive state management.
- Reduced app load time by 35% utilizing advanced Kotlin Coroutines leveraging Dispatchers for background thread management, async/await for parallel API calls, and SharedFlow for real-time event streaming.
- Integrated secure REST APIs via Retrofit and implemented a Secure DB (SQLCipher with Room) alongside Encrypted SharedPreferences to maintain strict end-to-end encryption for sensitive local data and session tokens.
- Managed reliable background processing for offline transaction syncing and daily data backups using WorkManager, ensuring execution even after app restarts.
- Implemented biometric authentication and end-to-end encryption for sensitive financial data handling.

Junior Android Developer | **Anspro Technologies** | April 2023 – Oct 2023 -7m, Bengaluru

- Built Healthcare app features including appointment booking and patient record management using Java and XML layouts, serving 10K+ active users.
- Integrated Firebase for push notifications, leveraging Broadcast Receivers to listen for incoming messages and network state changes, improving user engagement by 20%.

KEY PROJECTS

Banking / Fintech App— Kotlin, Compose, MVVM, Retrofit, Room, Biometric Auth

- Built a secure mobile banking app, featuring a modern Jetpack Compose UI and real-time transaction tracking powered by Kotlin Coroutines (SharedFlow).
- Implemented fund transfers and offline state management using background WorkManager tasks and a Secure DB architecture with Encrypted SharedPreferences for biometric auth sessions.

Healthcare Patient App— Kotlin, MVVM, Firebase, Google Maps API, Android SDK

- Developed a patient-facing app integrating Camera functionality for digital prescription uploads and Google Maps and Location Services for clinic routing.
- Streamlined system communications by utilizing foreground Services for real-time messaging, Broadcast Receivers for system alerts, and explicit Intents for deep-linking into appointment schedules.

EDUCATION

Bachelor of Engineering – Computer Science | **Visvesvaraya Technological University** | 2023
